

KHAN ARSIL

88280 55005 • arshilkhan8828@gmail.com

SUMMARY

Technically skilled professional with expertise in PHP, database management, and PC hardware. Proficient in designing and optimizing systems, with a strong understanding of hardware components and software integration. Developed a WiFi CSI-based human sensing system using ESP32 and Python for human activity detection, and a YOLOv8-based fall detection system using OpenCV for automated fall recognition and analysis. Always eager to learn, adapt and grow.

INTERNSHIPS

Paarsh Infotech

Dec 2024 - Feb 2025

- Understand the HTML, CSS, Bootstrap, and JavaScript languages.
- Understand how to develop Software and Programming using a back-end language.
- Understand how to know about the OOPs Concept in the PHP language.
- Create a SQL Database, front-end, and back-end.
- Know about the Server-side programming language.

IGNITECH

July 2022 - Aug 2022

- Gained foundational knowledge of OOP, Data Structures, Class and Objects, and MySQL in PHP.
 - Created the database of the project such as data storage, data organizing and relationship, CRUD operations, Indexing.
-

EDUCATION

Bachelors in Computer Engineering

Sep 2023 - Present

Maulana Mukhtar Ahmad Nadvi Technical Campus

Diploma in Computer Engineering

Aug 2021 - June 2023

Abdul Razzak Kalsekar Polytechnic

PROJECT

Wi-fi Based Human Sensing Using Deep Learning

- Developed a real-time WiFi-based Human Sensing System using ESP32-WROOM-32 and Channel State Information (CSI).
- Implemented CSI data acquisition in passive WiFi sniffing mode using ESP-IDF and WiFi CSI APIs.
- Captured and processed real-time CSI data to detect human presence and movement without cameras or wearable devices.
- Designed Python-based signal processing algorithms to analyze CSI variations and identify motion patterns.

Human Fall Detection Using OpenCV

- Developed a YOLOv8-based fall detection system for automated identification of fall and non-fall events.
- Performed dataset preprocessing, balancing, and augmentation to improve model accuracy.
- Trained and fine-tuned YOLOv8 object detection models using transfer learning and optimized hyperparameters.
- Evaluated model performance using Precision, Recall, F1-Score, and Confusion Matrix metrics.
- Generated comprehensive visual analytics including training curves, Precision-Recall curves, and detection visualizations.
- Achieved high detection performance suitable for smart healthcare and elderly fall monitoring applications.

SKILLS

- **PHP** : Server-side scripting, Form handling, Sessions & cookies, Database interaction.
- **Python** : NumPy, Pandas, Matplot, PyTorch, TensorFlow, Data analysis, Scripting & automation.
- **JavaScript** : DOM manipulation, Event-driven programming, Asynchronous programming, Promises & async/await, Closures.
- **Robotics** : ROS1, ROS2, Franka Emika Panda, Gazebo.
- **Machine Learning** : Deep Learning, (CNN, GNN), Computer Vision, WiFi CSI (Channel State Information).

OF

★ BEST PROJECT ★

BE COMPUTER ENGINEERING

PRESENTED TO

Ayan , Ammar , Arshil

*In recognition of your outstanding creativity, technical excellence,
innovation, and dedication in successfully completing and presenting
an exceptional project.*

Your hard work and commitment are truly commendable.

Prof. (Dr.) Aqueel Ah. Shah
Principal, MMANTC

Dr. Md. Salman Baig
Dean Academics
